

# **TAV - Report**

**Project: Luminosus**

Johannes Schneider and Tim Henning

October 29, 2017

## **1 Milestone 0**

### **1.1 Introduction**

- problem description and solution
- our roles (developer / tester)
- languages
- application type
- size
- available artifacts
- development paradigm
- testing status

### **1.2 Learning from failures**

- select 3-5 random failures from bug tracker
- discuss type of failure (preventable, complexity-related, intelligent)
- (failures detected during semester)

### **1.3 Five Basic V&V Questions**

- How would we answer them?
- (compare at the end of the semester)
